SAVE THE BOUNDARY WATERS

Campaign to Save the Boundary Waters Statement on Trump Administration's Killing of Boundary Waters Mining Study in Federal Budget Bill

ELY, MN: In response to the Trump Administration's [killing of a study](#) intended to analyze the impacts of sulfide-ore copper mining, Campaign to Save the Boundary Waters Executive Director Tom Landwehr said:

“The Trump Administration continues to bend over backwards to hand over America’s most popular Wilderness to a foreign mining company. It is mind-boggling how hard they are working to prevent the truth from being known--that the edge of the Boundary Waters Wilderness is the wrong place for a sulfide-ore copper mine.”
